

Dr. Wolf-Dieter Kessler and Dr. h.c. Burton Goldberg

American Broadcast Tuesday, 1st, July, 2003 3 o'clock p.m. western time, 6 o'clock p.m. eastern time, midnight in northern Germany

This broadcast is an attempt to provide those people with health problems, as well as everyone else who wants to deepen their knowledge of what could be done against disease, with an outline of an up- to- date therapy for how healing can be possible.

Welcome to everyone in the listening audience. Thank you, Burton, for inviting me to share my 30 years of experience with what one could call " the Mayo Clinic for Alternative Medicine". My 20 nurses and I run an international facility in northern Germany visited by people from all over the world.

Decades ago already, my vision was:

- first, alternative medicine has practical solutions for identifying and treating the underlying causes of medical problems and can bring lasting relief for a myriad of diseases.
- Second, alternative and conventional methods must be combined and orchestrated to benefit the patient that is seeking help.

We have created, and want to introduce, a whole diagnostic and therapeutic system, today. So I could talk about chronic fatigue syndrom or ALS, multiple sklerosis, lime`s disease, fibromyalgia, glaucoma of the eyes, allergies, depression and mental disorders , intestinal problems etc.

But, for now, let me tell you about an ovarian cancer case. The 50 year old lady - let`s call her Maria - was almost dying when she was brought to our clinic by a family member. The cancer had metastazised into the throat, liver and back. In addition she had a severe skin allergy due to a false chemical injection that let her skin break and bleed. Her anxiety and helplessness were heartbreaking for she had lost her faith into doctors.

Let me tell you of the many approaches we used in helping Maria.

First we did Iridology, diagnosis of the iris. This gave important hints concerning metabolism and weaknesses of the body and organs.

Very fortunate for this one patient. Josef Deck, a German Iridologist has been working on that all his life. Our findings were computerized for possible treatment.

Second, the physical check up revealed a chronic pneumonitis and kachexia but did not give us any remedies or further treating options.

Third, we performed Electrodermal Screening (EDS) with the Vega test. This method uses an acupuncture point as an information center. It tells us a lot. Here we started to diagnose the causes of the disease. Nutrients, viruses, bacteria, immune system, trace elements, vitamins, pesticides, mental disorders , hormones , and importantly the causal chain. That means: which organ is causing that cancer other than the

ovary. Which organ is actually passing that hot potato of the body's problem to the ovary. I claim, that diseases have a complexity of reasons and in this case the ovarian cancer was partly caused by chronic pneumonia which the patient was not aware of. However, it turned out that she had severe pneumonia in the past. Last but not least, the ED Screening finds us the proper remedies to eliminate virus-toxins and to balance the diseased organs. The remedies found by EDS are homeopathics, plants, nosodes (homeopathic toxins), orthomoleculars, amino acids, hormones and chemicals (if necessary).

Daily homeopathic substances were tested and administered. Her skin got better and her finger tips started healing. She - for the first time after a long period - felt herself coming back to life. Her head cleared up and she could think again clearly.

One dramatic finding by EDS was crucial for any future therapy: Her blood was "left rotating". It should rotate to the right (an expression in physics for fluids that would turn the level of polarized light to the left as laevulose does, a left rotating sugar. This condition is incompatible with life functions for enzymes our enzymes in the blood cannot bind to metabolites. It is like putting the proper key downside up into the lock. It simply doesn't work. This was treated with Vegaselect, a Bioresonance device, SI card and drops produced by that system.

Fourth, we ran the SEG (Segment-Electrogram). This device is computerized and has been invented at the University of Heidelberg by professor Heim. It shows us, how good or bad the organs "work" , telling us where we have to focus our therapy first. It also provides a strong control method to monitor the effectivity of our treatment. It showed a severe deregulation in Maria's chest . Again we were reminded of her chronic pneumonia.

So by using several different diagnostic methods, we make sure we are working on the underlying cause of the patient's problem.

For successful treatment we must know this to begin with. And this is the domain of Functional Medicine. We were able to detect chronic pneumonia . X-ray did not show anything there because the inflammation was so chronic and such a smoldering fire, that it would not show on X-ray. However, this chronic smoldering not only uses up hormones and messes up the lymph, but also blocks the immune system and prevents it from tumor surveillance.

Fifth, the Quint System. This is the most sophisticated vectorized diagnostics and therapeutic system invented by Dr. Steiner in Austria.

However, it is difficult to handle and to learn and it takes an expert and long training to use it to its full potential. It tells us which radioactive heavy metal, which hormone, which nutrient, which psychological background , and which remedy is leading! Our patient had a dramatic hormonal deficiency of progesterone, a load of radioactive sodium , a load of DDT, a xenoestrogen and a deadly pesticide and she was feeding her disease (she was not supposed to eat wheat, gluten or cow milk products). We loaded all Quint remedies into a treating device called a "Quint Box" including progesterone. The frequencies of all these remedies were then transmitted digitally into her brain during sleep. This continued for months.

Sixth, desensitization of auto-immune disease. A simple method introduced by Dr.

Karl Theurer can stop autoimmune antibodies.

Autologous immunoglobulines are bound to aluminumhydroxyde, a certain acid (Kieselsäure) and serum activators. Thereby they will be converted to anti-auto-antibodies. The advantage of this method is the fact, that the causative sensitizing allergen has not to be known. Thus even transplanted organs will have a longer survival time. We did not need this method in her case. EDS did not show auto-aggression.

Eighth, Kinesiology is widely used to identify where, what, how, and with what an individual shall be treated. This method uses simple muscle tests and the body of the patient does not lie, according to John Diamond. This method can also be used effectively against depression, fear, anxiety and various mental disorders. We needed to work with Psycho-Kinesiology according to Klinghardt to release fear and anxiety.

Nineth, the Ondamed System. This is the latest German invention of enormous impact on effective treatment of chronic diseases. This system is guiding the therapist like a lazer beam to proper action. The system helps find specific healing frequencies for the patient. The frequencies also relate to certain organs or viruses, bacteria or parasites. Especially the 172 preset programs can be individually tested for each patient and provide deep harmonization of the diseased organism. Frequencies below 10 Hertz treat brain and nerval dysfunctions. There are also programs for alpha, beta, theta and delta waves of the brain. Since most diseases are anchored in our brain and central nervous system, Ondamed is a powerful tool to break those stored pathological signals. Even if we use all the other therapies such as EDS, Quint System, Reflexology, Kinesiology, Vegaselect, Mitozan, Bicom etc. we still would have to deal with problems of non-response to the therapy. That is where Ondamed comes in.

The main problem in healing and treating disease is the non-responding patient. This is caused by "blocked" tissues, "blocked lymph", and "blocked organs". The Ondamed System can detect those blocked areas and eliminate them effectively with individual frequencies for each patient. Again and again we found her to be treated with a special program for external influences. Despite that, we needed to treat the tumor in her lower abdomen. We treated her twice a day monitoring her immune score according to Schimmel.

The immune score was tested before and after the Ondamed treatment. Each time this score was improved. Maria improved dramatically. She gained energy, gained 7 pounds and we were able to send her to a special clinic in southern Germany for Hyperthermia and low dose chemotherapy. Without our diagnostics with the Quint system and foremost the follow up treatment with the Ondamed System, Maria would not have been able to tolerate hyperthermia and low dose chemo.

After 2 months Maria walks again and visited a super market. Her friends and family cannot believe it how dramatically she recovered.

Tenth, heavy metal detoxification. According to Gary Gordon, the leader and founder of chelation therapy, this method is vital for recovery. A combination of oral chelation and intravenous Calcium Disodium EDTA is regarded to be optimal. Without the oral chelation, too many metals would be reabsorbed in our intestine and would flow back to the liver, consequently intoxicating our liver functions, poisoning our whole body,

and blocking the immune system. So far heavy metal detox for Maria was restricted to the biochemical Quint method in order to eliminate radioactive sodium. However, Maria is now able to swallow again and we will shift to Gary Gordon`s protocoll.

Eleventh, the Transfer Factor. This refers to modulating the immune system by boosting the education of T Lymphocytes. It is done by using small proteins of an immune-strong donor. We obtain these proteins from the donor`s white blood cells which have to be dialysed (kind of a filtration process) . Then they will be administered to Maria and within 24 hours or a few days she will then have the same strong T lymphocytes as the donor. This is beeing scheduled.

Twelfth, Dendritic Cells. This method seems to be an essential additive in anti-tumor-therapy. Dendritic cells is a rare species of white blood cells which have not been really in use until the late 1990ies. Once they encounter tumor tissue or tumor cells in the blood they start digesting them and presenting tumor antibodies on their surface. This attracts T lymphocytes that will now continue to clone . A new army of T lymphocytes grows and all are programmed to find and attack tumor tissue since they picked up their program from the cell surface of the dendritic cells.

Thirteenth, Reflexology of the feet. Each organ is projecting itself on the foot. Painfull and gelotic areas on the foot represent a major dysfunction of the related organ. By professional massage techniques this zones can be brought back to function. Consequently the related organ resumes better function .

Fourteenth, Bach flowers. Dr. Bach, an English doctor discovered the unbelievable healing potential of flowers if administered individually and specifically. To find the right flower, we use Kinesiology or EDS. They are very valuable for treating our nervous system.

Fifteenth, BEV (Biological Terrain according to Dr. Vincent). This French professor did extensive research on our body fluids, saliva, blood, and urin. He discovered that tumors only exist in a certain environment. So changing and altering the body fluids by elimination of toxic substances layer by layer - as an onion - we are able to objectively controll our efforts by BEV.

Sixteenth, Homeopathy, This powerful tool unfortunately often lacks skilled therapists. Kent, Clarke and Burnett demonstrated repeatedly how wonderfully D100 potencies could heal cancer if applied at the right time. To do that we have put together about 40.000 potentiated substances and select by EDS and biological index . Thus we are able to predict the effect of each found substance. Maria needed many different substances. Some were very important such es psorinum D100, hydrofluoric acid D100 and calendula D100.

Seventeenth, Sanum remedies. This method is called Isopathie. It uses the same microorganism that is causing disease . However it is given as a potentiated remedy. Most successful have been: Notakehl, Nigersan, Mucokehl, and Utilin.

After all Maria has improved her health so much, that all her friends are puzzled. This shall show that there is a chance to reverse anything. We are still working on her case and will apply all available tools to

get her to complete recovery.

Wolf-Dieter Kessler M.D.
